

IMAGE GENERATION USING DALL – E

PROMPT:

Create a dark, attractive, futuristic technical background using deep blue tones such as midnight blue, navy blue, cobalt, and electric blue. Add glowing neon-blue highlights to create a high-tech look. Include abstract AI elements like circuit lines, neural network nodes, holographic data panels, digital waves, and geometric tech patterns. Blend soft gradients and luminous blue accents to maintain a sleek, modern aesthetic. Place the title 'PROMPT ENGINEERING' in bold, glowing electric-blue typography, integrated harmoniously into the design. No humans or characters.

OUTPUT:
